01

Profile

Academic training and current direction

I am a Ph.D. student in Epidemiology and Health Statistics at the School of Public Health, Xiamen University (admitted 2026, supervised by Prof. Tianmu Chen), and I hold an M.Sc. in Computer Science and Technology from Macau University of Science and Technology. My research focuses on infectious disease forecasting, influenza co-circulation analysis, outbreak modelling, and related research software.

02

Education

Degrees and thesis work

Xiamen University

Ph.D. student in Epidemiology and Health Statistics (2026–present)

School of Public Health · doctoral study under Prof. Tianmu Chen

Doctoral research extends toward multimodal infectious disease spatiotemporal dynamics, viral evolution early warning, and integrated macro-micro modelling frameworks.

Macau University of Science and Technology

M.Sc. in Computer Science and Technology, Faculty of Innovation Engineering

Graduated · GPA 3.63/4 · Full scholarship and living allowance

Completed M.Sc. training in Computer Science and Technology under Academician Nanshan Zhong and Prof. Chitin Hon, with joint training at Xiamen University (co-supervised by Prof. Tianmu Chen), focusing primarily on infectious disease forecasting and early warning. Graduate training emphasized intelligent control technology, artificial intelligence, numerical analysis, statistics, pattern recognition, algorithm theory, and optimization methods.

Xiamen University

B.Med. in Preventive Medicine (School of Public Health) & B.Sc. in Mathematical Statistics (Wang Yanan Institute for Studies in Economics)

Preventive Medicine supervised by Prof. Tianmu Chen

Academic and project experience during the undergraduate stage laid the groundwork for infectious-disease modelling, health data analysis, and later AI-assisted research workflows. Selected high-mark coursework: Epidemiology, Biostatistics, and Health Statistics.

Master' s thesis

Multi-source-data-driven study of influenza spatiotemporal transmission dynamics, viral evolution, and early warning in China

Completed master's thesis direction

The completed thesis linked surveillance, environmental, behavioral, and sequence-related evidence while keeping completed work, submitted manuscripts, and future doctoral stages explicitly separated.

03

Research Interests

Topics under active study

— Multimodal infectious disease forecasting and early warning.

-
- Influenza co-circulation analysis, co-infection signals, and non-stationary time-series modelling.
-
- Spatiotemporal transmission dynamics, small-sample outbreak modelling, and viral evolution.
-

Preprints 2

1. Multi-modal Adaptive Estimation for Temporal Respiratory Disease Outbreak

Preprint

arXiv preprint · 2025 · First author

Status: Public preprint; journal submission under review

First-author MAESTRO study. In the documented evaluation context, the reported R^2 reached 0.956 on a 10-year Hong Kong influenza dataset.

DOL: 10.48550/arXiv.2509.08578

2. Three machine-learning models to predict dengue vectors Breteau Index based on meteorology and biotope in Fujian China

Preprint

Research Square (preprint) · 2024 · Co-author (2/10)

Status: Preprint

Preprint posted on Research Square in April 2024; Ke is the first author and Hong Liu is a contributing co-author (2/10). No published journal version has been identified.

DOL: 10.21203/rs.3.rs-4286413/v1

Submitted / under review 1

1. Psychological resilience, occupational stress, organizational trust, and burnout among healthcare workers

Under review

Health Soft Science · 2025 · Co-author (2/6)

Status: Submitted; with editorial office

Questionnaire-based collaborative study using CFA, SEM, and bootstrap analysis.

Manuscript ID: 251802

Awards

Selected honors and competition results

2025	Regional First Prize, 15th MathorCup Mathematical Application Challenge (Graduate Division) China Society for Overall Planning, Optimization and Economic Mathematics
2025	National Third Prize, 15th MathorCup Mathematical Application Challenge (Graduate Division) China Society for Overall Planning, Optimization and Economic Mathematics
2025	Second Prize, 20th Citibank Financial Innovation Application Competition Shanghai University Student Science and Technology Entrepreneurship Foundation; Citigroup Financial Information Services (China) Co., Ltd.
2024	Third Prize, 21st China Graduate Mathematical Contest in Modeling (“Huawei Cup”) China Graduate Mathematical Contest in Modeling Organizing Committee
2024	Project Innovation Award, 13th “Win in Guangzhou” Hong Kong–Macao Division “Win in Guangzhou” University Entrepreneurship Competition Organizing Committee

07

Experience

Research, coursework, and service

2024–2025

Macau University of Science and Technology

Completed M.Sc. coursework

Completed coursework in intelligent control technology, artificial intelligence, numerical analysis, statistics, pattern recognition, algorithm theory, and optimization methods, with a cumulative GPA of 3.63/4.

2019–2021

Xiamen University

Student service roles

Served as a student staff member in the medical school organization department and later as deputy head in the innovation service division of the student technology, entrepreneurship, and employment service center.

2024–2025

Collaborative laboratory project

Laboratory escape-risk digital twin project

Participated in full-stack development for a P3 laboratory digital twin and risk-assessment workflow involving Unity3D, Python, Flask, MySQL, and scenario simulation.

2024–2025

Collaborative laboratory project

Protein design and structure-biology tooling support

Supported target-site discovery and primer design workflows using masif_seed, Rosetta, AlphaFold 3, and RFDiffusion.

2024–present

Independent project

Infectious-disease news data platform

Independently developed and maintained a platform covering data collection, cleaning, ETL, database ingestion, and visualization for infectious-disease news and event monitoring.

2024–2025

Collaborative health research project

Questionnaire data cleaning and SEM analysis

Handled large-scale questionnaire cleaning, CFA, SEM, reliability and validity analysis, and bootstrap-based inference for healthcare workforce research.

2020–2024

Xiamen University and related teams

Selected practice and volunteer activities

Participated in outreach, practice, and volunteer activities including recruitment outreach, public-health themed practice teams, and report writing.

2024–2025

Modelling and innovation competitions

Competition projects

Contributed modelling, optimization, software implementation, and evaluation work in the Huawei Cup, MathorCup, Citibank competition, and related innovation contests.
